In reply would say, I have used it on coravate and garden vegetables with very satisfactory results. I broke three acres of old meadow land, so hadly run out that there was searcely one-half ton id kay on the whole. I sowed 200 lbs. of Phosphate on one acre, and sowed the whole to out with no manure on the other portion; there was a marked difference through the season, and it was the general opinion that the yield of the part treated with the Phosphate was double that of the other. I believe that 200 lbs. to the acre, sowed to almost any kind of grain, will produce better results than 20 leads of good stable manure the first year, further I have had no apperience. So far I have yet to learn of the first individual using the Phosphate, who has not been pleased with its effects upon the treatment of the season has Fertilizer up to its present standard (as of course he will), I bave no cloud to fits complete success here.

Does Farming Pays

One of my neighbors, says an editor One of my neighbors, says an enter of the Agriculturist, has just sold twenty acres of his farm to a German fer over \$200 per acre. The land is on a prossional, seven miles from the centre of New York city, and has been so much neglected that it will cost at least fifty delicate pure acre and two years' time to dollars per acre and two years' time to get it clean and in good condition. The farmer who sold this land does not make three per cent. on \$100 an acre from his farm, and if the German can make it pay at \$250 per nere, it will be another illustration of what industry, thrift and entorprize can accomplish. It seems to me, however, that such a man would have done better to have gone West.

He is withat a capital tarmer, keeps his land clean, and works it thoroughly. He is a good neighbor—not helined to borrow, and willing to lend; and if he does borrow anything for a few hours he relurns it prouptly. He is as cheer-inl as the day, minds his own business, and is always cheerful with his work. He keeps a good span of ralher gay young horses that he bird himself, and which are always well groomed and full of spirit; a nice rarriage that is always ean neither read nor write, aml one-third of them are voters.

THE MOST IMPORTANT IMPROVE MENT EVER MADE ON SEWING

MACHINES. Health Preserving and Labor Saying invention! wince can be applied to all kinds or Sewing Machines now in use. This is oney and important invention, designed and is require the laber of runding sewling machines, and is regardly well adapted to driving light machinery by foot power. The use of the crank is entirely dispersed with so that there are no dead points. This the least pressure of the faut, and attempt in the right direction.

The old trouble of always being obliged to use the hand in starting the machine is entirely avoided, thus giving the operator both kinds to guide and govern the work.

Ladies, before much because of physical weakness, to touch their Sewing Machines, with this Treadle naw do their work with case and comfort.

The points, therefore, are greater speech beschor, and entire escape from those discusses which have affilied females whereuptly of on sewing machines, and accomplishing a MYCH LABGER AMOUNT OF WORK.

SENATE.

A large number of bills appreprialing money to compensate certain parties for loss or damage to property during the recent wer, were passed. While the Indian Appropriation bill was under discension, Mr. Windom, of Minn., said that the Teton Sioux Indians were led by a chief called "Sitting Bull," who admitted that he had instigated the massager in Minnesota in 1862, and if they could be got at with powder and lead he (Windom) would infinitely prefer to deal with them in that way, but as the case stood he preferred to feed them as the cheapest way of keeping them quiet, and sealed are they who seek relief from the West. The stemboat Oceanns, from Red river for St. Louis, when near Brooks Point, twenty miles above Csiro, exploded her boilers, tearing the boat fore and aft, completely wrecking her, and sealding and drowning a large number of the crew is not shated, but it is known that there were slxty-five passagers on board. Only thirty-one of the passengers and crew arrived at Cairo, and it is believed that loss of life will be fifty persons killed.

Blessed are they who seek relief from "Liver Complaint," "Billnousness," A TERRIBLY fatal accident is reported
